**STAIRCASES**

## WE CREATE SPACE

## WE CONNECT FLOORS

## WE GIVE NEW PERSPECTIVES

Stairs are an important element of multi-storey houses and flats. They increase the comfort of living by enlarging the space in which we live every day. They also significantly influence the atmosphere of the house. This is why it is so important to choose the right stairs, their type, character, material they are made of and design.

Home is the most important living space for everyone. An atmospheric, spacious and comfortable home means good mood and relaxation. And space is at a premium today. Whether connecting floors, providing access to the attic or literally creating new space in the form of a mezzanine floor, staircase is becoming an essential element of homes and multi-storey flats. Stairs have a significant impact on the atmosphere of a house, too. This is why choosing the right staircase, its type, character, material of construction or design is so important.

DOLLE offers a full range of solutions from wooden to metal stairs, from compact models for small rooms to those suitable for spacious rooms. Wooden, spiral, modular and external. In total over 5,000 models designed and manufactured with the utmost care to find the perfect solution for every home. Your home is your castle. We will help you to make it comfortable and atmospheric.
